Monica,

I have reviewed the last file, and discussed the site with the Environmental Bureau Chief at a minimum Harvest needs to sample MW-2 for a full 8260 and verify that there are no more impacts in the well.

If everything goes well submit a close request including the samples and plan to plug wells etc..

Cory,

I don't have any other information that what is provide on the website.

I did speak to the land owner he stated that 4 of the well have been removed, the one remains. It is the last of the equipment on site with a 3 foot pipe sticking out the ground that we would like removed.

Based on this information, can you please let me know the required next steps in order to remove?

Thank you,
Monica

Monica,

Is there any other samples or reports other than the 2005? Report? Looking over the report MW2 has not had 8 consecutive quarters of clean samples. The xylenes are still over the closure standards.

Hi Cory,

Can you help me with the request below?

As noted below the land owner has requested the removal of a historic well. A closure report was submitted in 2005 with no approval, found.

Will you need to approve the closure report before we remove? Is there a formal process for removing the well that we need to follow?

Thank –you,

Monica Smith

Good afternoon,

Hilcorp recently P&A this well site. There is still a monitoring well on location that the landowner wants removed. I did a search and it seems to be from an old Williams release. A closure request was found but no approval.

<http://ocdimage.emnrd.state.nm.us/imaging/AEOrderFileView.aspx?appNo=pENV00003RP337>

Can one of you see about P&A the test well and contact the landowner, Mr. Blassingame? He won't sign off on our P&A of the location until it's removed.

Let me know if you have any questions.

Thank you,

Jennifer Deal
