**RE: Determination of Stage 2 Abatement Plan Modification Approval for Former Caribou Refinery Site**  
**(Abatement Plan: AP-51; Facility ID: fab00000000658)**

Mr. Jayroe,

The Oil Conservation Division (OCD) received a Stage 2 Abatement Plan Modification Report dated October 4, 2022 on Maverik Country Stores (Maverik) behalf by TRC, detailing decades of monitoring, abatement, and includes a request to modify its Stage 2 abatement plan per Subsection A of 19.15.30.18 NMAC.

The OCD has reviewed the request and determined that Maverik has demonstrated and met the requirement for the aforementioned citation.

This finding by the OCD does not relieve Maverik of responsibility if future information shows a threat resulting from significant change in the documented levels for the constituents of concern, in ground water, surface water, human health, or the environment. Further, it does not relieve Maverik of responsibility for compliance with any federal, state, or local law.

If you have any questions, please contact Nelson Velez of the Environmental Incident Group at (505) 469-6146 or by email at [nelson.velez@emnrd.nm.gov](mailto:nelson.velez@emnrd.nm.gov).

Respectfully,

Dylan Fuge,  
Division Director (Acting)  
Oil Conservation Division
