13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

We are given until 3/31/2004 to return this well to production. We are moving a pumping unit to the well so that production can be resumed. Our intent is to review production and then plan a well intervention to increase production. While preparing to move equipment to the well site, it was discovered that numerous fences have been installed by NAPI and surface owners. We have contacted several of the surface owners, all of whom claim that others installed and maintain the fences. We will attempt to gain access to the location so that production equipment can be restored by the above date, but, as of this writing, finding the individuals who can give us access is unsuccessful. We will diligently pursue this project and let you know when we have the equipment operating.
