13. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

10/10/2002 Operations commenced to return the NEBU 306 to production. Fishing operations were resumed attempting to retrieve a 2-3/8" tbg fish in the well with top at 2525'. Our records showed a 5-1/2" csg string in place tied into 5-1/2" liner at 3217'. Fishing operations continued until 10/30/02 and we were able to remove all the tbg in the well to a depth of 3229' and we milled the old liner top to 3220' (tubing tally depth). At this depth we were unable to make sufficient progress to economically continue fishing operations. Records show tbg to be in the well to a depth of 8040' (PBSD). We were consulting partners and evaluation future operations at this time.

14. I hereby certify that the foregoing is true and correct.
