13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

It is intended to recomplate the subject well in the Chacra formation. The existing Mesaverde and Dakota formations will be isolated and the Chacra formation will be perforated and stimulated. The wellbore will be cleaned out to plug back total depth. The well will then be commingled. A down hole commingle application will be submitted.

14. I hereby certify that the foregoing is true and correct.

Electronic Submission #17610 verified by the BLM Well Information System  
For MERIDIAN OIL INCORPORATED, sent to the Rio Puerco  
Committed to AFMSS for processing by Angie Medina-Jones on 01/21/2003 (03AMJ0184SE)

ENVIRONMENTAL CONDITIONS OF APPROVAL  
FOR RECOMPLETION IN CHACRA INTERVAL

Operator BURLINGTON RESOURCES OIL & GAS

Well Name JICARILLA 153 10E      API Well No. 30-039-22418

Legal Location 925 FSL & 1658 FWL, Sec. 26 T. 26 N. R. 5 W. NMPM

Lease Number JIC CONTRACT #153

The following stipulations will apply to this well unless a particular Surface Managing Agency (SMA) or private surface owner has supplied to the BLM and the operator a contradictory environmental stipulation. The failure of the operator to comply with these requirements may result in the assessment of liquidated damages or penalties pursuant to 43 CFR 3163.1 or 3163.2. A copy of these conditions of approval shall be present on the location during construction, drilling and reclamation activity.

An agreement between the operator and Fee landowner will take precedence over BLM surface stipulations unless 1) the BLM determines that the operator's actions will affect adjacent Federal or Indian surface (43 CFR Part 3160), or 2) the operator does not maintain the well area and lease premises in a workmanlike manner with due regard for safety, conservation and appearance (43 CFR Part 3162.5\_3), or 3) no such agreement exists (43 CFR Part 3160), or 4) in the event of well abandonment, minimal Federal restoration requirements will be required (43 CFR Part 3162.3\_4).

The approval of this action does not grant or imply approval of any off-lease or off-unit action. It is the responsibility of the applicant to obtain any such approvals from the appropriate surface management agency, including BLM, BIA and/or any private landowners.

**On Federal Surface or Minerals, the operator or his contractor will contact the BLM Cuba Field Office, at (505) 289-3748, approximately 24 to 48 hours prior to construction activities and again, upon site completion prior to moving on drilling rig.**

**For Wells on Tribal Surface, the operator or his contractor will contact the Jicarilla Tribal Inspectors, at (505) 759-3485 ext 31.**

I. Site Specific Stipulations for Chacra Recompletion

A. All fluids will be contained in either a lined pit or tank.
