13. Describe Proposed or Compelled Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Production has fallen off, we believe due to coal fines behind the liner. We plan to pull the liner and clean out the open hole. When cleaned out, we plan to run a new perforated liner. We would need to build a blow pit in an already disturbed area, where the original drilling pit was. The pit will be lined with 8 mil plastic. The current pipe set up is, 7" 23# casing set at 3077' KB, 5 1/2" K-55 17# perforated liner, with the liner hangar at 3062' and the bottom of the 5 1/2" at 3390' KB. The original open hole was drilled to 3528'. We have 2 7/8 tubing at 3327'. The pit will be back filled as soon as possible when finished and seeded with new BLM approved mixture. We would like to start as soon as approved and a rig becomes available.

I hereby certify that the foregoing is true and correct
