SUNDRY NOTICES AND REPORTS ON WELLS

Do not use this form for proposals to drill or to deepen or reentry to a different reservoir.
Use "APPLICATION FOR PERMIT—" for such proposals

5. Lease Designation and Serial No.
NM-013642

6. If Indian, Allottee or Tribe Name

NA

7. If Unit or CA, Agreement Designation

NA

8. Well Name and No.

Gardner C-6

9. API Well No.

3004527998

10. Field and Pool, or Exploratory Area

Basin Fruitland Coal

11. County or Parish, State

San Juan County
New Mexico

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Compelled Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Production has fallen off, we believe due to coal fines behind the liner. We plan to pull the liner and clean out the open hole. When cleaned out, we plan to run a new perforated liner. We would need to build a blow pit in an already disturbed area, where the original drilling pit was. The pit will be lined with 8 mil plastic. The current pipe set up is, 7" 23# casing set at 3350' KB, 5 1/2" K-55 17# perforated liner, with the liner hangar at 3289' and the bottom of the 5 1/2" at 3599' KB. The original open hole was drilled to 3769'. We have 2 7/8 tubing at 3556'. The pit will be back filled as soon as possible when finished and seeded with new BLM approved mixture. We would like to start as soon as approved and a rig becomes available.

I hereby certify that the foregoing is true and correct
