✓ 1. All spills and pits have been closed pursuant to OCD guidelines.

✓ 2. The rat hole and cellar have been filled and leveled.

✓ 3. Cathodic protection holes have been properly abandoned.

✓ 4. A steel marker at least 4 inches in diameter and extending at least 4 feet above ground level marking the exact location of the well has been set in cement. The operator name, the property name, the well number, the well location by unit letter or quarter/quarter section, section, township, range, and API number have been permanently welded, stamped, or engraved on the marker.

✓ 5. The location has been leveled and cleaned of all junk and equipment.

✓ 6. Anchors, deadmen, and tiedowns and risers have been cut off at least 2 feet below ground level.

✓ 7. Pipelines and flowlines have been abandoned in accordance with Rule 714. Hydrocarbon liquids and produced water have been removed from non-retrieved flowlines and pipelines 741B.(4)(b) 4B.

✓ 8. If this is the last well on this property, all centralized equipment has been removed and all centralized pits have been closed to OCD guidelines.

This site is ready for inspection
