OTHER: Cathodic Protection Groundbed	
12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompilation.	
ConocoPhillips proposes to drill a cathodic protection deep well groundbed for the subject wll. Will drill a 6-7/8" hole to an anticipated minimum depth of 300' (maximum depth of 500'). Cement plugs will not be used unless more than one water zone is encountered. Prior drilling history for the area indicates only one zone to that depth. If more than one water zone is encountered, notification will be made and details of the cement and casing will be provided.	
All drilling activity will remain on existing well pad and a Farmington based company will be doing the drilling for ConocoPhillips Company.	
See attached drawing on proposed placement of groundbed & underground	AC & DC cables and rectifier.
I hereby certify that the information above is true and complete to the best of my knowledge and belief
