13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Please reference BLM letter of March 04, 2004. It is our intent to run slick line, tag and test the subject well within the next 30 days. If there is no fill across the perforations, we will follow up with a three day flow test. Based on the three day test, we will determine if it is worth putting the well on compression. Pending the results of these tests, a further plan of action will be determined.

14. I hereby certify that the foregoing is true and correct.
