13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

ConocoPhillips Company is requesting a variance to Onshore Order III A.1.b (that all lines entering the oil storage tanks shall have valves capable of being effectively seal during the sales operations). We feel this well qualifies for the variance according to III A.1.e.iv., because it only produces approx 4 bbls of condensate per month and has a 300 bbl tank on site. Sales occur approx. once a month and we feel no or minimal loss of production revenue to the BLM would occur during the sales operations. Attached is the wells' site security diagram.
