13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

In a follow up to the Sundry Notice dated 7/23/02 and that was approved by the BLM on 7/28/02, found that the Menefee had already been perforated at 2726-2734 and at 2746-2750 and a CFBP was set at 2769'. Subbed well and produced only water and only a trace of oil and gas on 8/17/02 through 8/20/02.

A Mechanical Integrity Test was then performed successfully on 8/20/02 and was witnessed by AIEPA of the BLM, CWA, NM Office and by Johnny Angel, Pride Energy Company's engineering consultant. A New Mexico Oil Conservation Division representative was not available for the witness of the MIT. The well was then temporarily abandoned.
