13. Describe Proposed or Completed Operation (clearly state all pertinent details including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths or pertinent markers and sands. Attach the Bond under which the work will performed or provide the Bond No. on file with the BLM/ BIA. Required susequet reports shqll be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in anew interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notice shall be filed only after all requirements, including reclamantion, have been completed, and the operator has determined that the site is ready for final inspection.)

Devon Energy proposes to rig up on subject well to recavitate. The 5-1/2" liner will be removed from wellbore. The 7" intermediate casing will be tested to 500 psi. We would like to then drill 100' into the PC formation for a sump. A mud logger will be on location during drilling and logs will be distributed to the BLM. The hole will then be underreamed to 9-1/2" and natural and air assisted surges will be utilized to remove near wellbore material. Pending well conditions, a liner may or may not be run back in well. Production tubing will be landed and the well will be turned to sales.

verbal approval granted 7/30/04 to K. Rhoades @ 1430
