13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

During the recompletion procedure a casing leak was discovered @ approx. 130' - 160'. Steve Mason with the BLM was called on 9/8/04 and instructed BR to run a CBL & advise where cement tops were. On 9/13/04 Steve Mason was called and told that the CBL indicated good TOC @ 1170' w/stringers from 1020' - 1060' and another set @ 600' - 640'. It was determined not to shoot a hole in the casing trying to get circulation since the stringers would probably prohibit good circulation, but to squeeze the leak and then get a good PT before continuing with the completion operations. Steve indicated that at final abandonment they will probably require the Kirtland Interval be squeezed.

14. I hereby certify that the foregoing is true and correct.

Electronic Submission #36033 verified by the BLM Well Information System
For BURLINGTON RESOURCES O&G CO LP, sent to the Farmington
Committed to AFMSS for processing by STEVE MASON on 09/14/2004 (04SXM2020SE)

Name (Printed/Typed) PATSY CLUGSTON

Title SR. REGULATORY SPECIALIST

Signature (Electronic Submission)

Date 09/13/2004

THIS SPACE FOR FEDERAL OR STATE OFFICE USE
