BP America Production Company request permission to surface commingle production the Basin Fruitland Coal, Blanco Mesaverde, Blanco South Pictured Cliffs and Otero Chacra Pools from our Riddle F LS No. 3 and Riddle I No. 1 wells. Surface commingling Blanco Mesaverde, Blanco S. Pictured Cliffs & Otero Chacra production will consist of the Riddle F LS No. 3; and Basin Fruitland Coal production will be from the Riddle I No. 1. The production from each well will be metered prior to commingling (please note: production from the Riddle F LS No. 3 is currently being commingled downhole with production allocated based on the subtraction method - DHC-3175) then the commingled production will flow into through the separator where the liquids will be removed.

The commingled gas will then be sent through compression prior to entering the sales meter. Please reference the attached schematics reflecting the Current Facilities Layout and the Proposed Surface Commingling Layout provided for your reference.
