## RISK ANALYSIS FOR EARTHEN PIT CLOSURE

Burlington Resources requests closure of the earthen pit at this location using a limited risk analysis based upon the following conditions:

- 1. The pit is <u>not</u> located inside the NMOCD defined Vulnerable Areas.
- 2. Groundwater is estimated to be at a depth greater than 100 feet.
- 3. The pit is <u>not</u> located within the Wellhead Protection Area within 200 feet of a private domestic water source or within 1000 feet of all other water sources.
- 4. The pit is located greater than 1000 feet to surface water.
- 5. The soils from below the pit bottom were analyzed and the only parameter above NMOCD closure guidelines was total BTEX, which exceeded 50 ppm. The benzene and Total Petroleum Hydrocarbons (TPH) levels were within the NMOCD closure guidelines.

Burlington Resources believes that the earthen pit poses minimal threat to groundwater, human health and the environment.
