☐ Water Shut off

☐ Conversion to Injection

13. Describe Proposed or Completed Operations

San Juan 28-6 Unit #185M production cement is at 4,200' (from CBL) and the shoe of the 7" intermediate casing is at 3,500'. We will remediate by shooting a squeeze hole at approx 4,200' and bringing the cement up into the 7" intermediate casing by approximately 100' (to 3,400') -- after completing both the Dakota and Mesaverde zones. We will complete the Dakota intervals and produce for approximately three months before returning and completing the Mesaverde intervals. Our estimated timeline for completing the Mesaverde and remediating the production cement is approximately 1/31/05." Verbal Approval was received from Steve Mason, BLM on 10-18-04.

14. I hereby certify that the foregoing is true and correct.
