12. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompilation.

Devon Energy requests approval to rig up on subject well and install 5-1/2" production liner, due to production decreases. The well bore will be cleaned to PBTD. We would then like to rig up mud loggers and drill a 100' sump into the PC. Logs will be distributed upon completion of work. A 5-1/2" liner will then be set in well and left uncemented. Perforations will be shot through the producing coal intervals. The production tubing will be ran in well, as well as the rod string. The well will then be turned to sales.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
