13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.) In August, 2004, the 1-1/2" tubing string was pulled and replaced with 2-3/8" tubing landed at 7,110' KBM. Then, the well was swabbed and returned to production on plunger lift. On September 16th, 2004 the well was returned to sales. The well is currently economic and producing approximately 35 MCFPD, 2 BWPD, and 1 BCPD. Please accept this report as a return to production from the Dakota Formation.
