Patina San Juan, Inc. request approval to down-hole commingle the subject well. Patina plans to down-hole commingle					
the Mesaverde Point Lookout (72319) and the Tapacito Pictured Cliffs (85920) pools in this wellbore. The commingling of					
the two pools is pre-approved per NMOCD Order #11563.					
The well is currently a Dakota/PC commingle, Patina San Juan, Inc plans to set a CIBP @ approx. 6200' and isolate the					
Dakota and perforate the Point Lookout at approx. 5765' – 5895', then commingle the production with the Tapacito					
Pictured Cliffs. Work will begin soon after approval.

Agent for Patina San Juan

## **Statement of Commingling**

Tribal "C" #10 Section 7, T26N – R3W Rio Arriba County, New Mexico

The commingling of the Tapacito Pictured Cliffs and Mesaverde Point Lookout pools in this wellbore will not reduce the value of the remaining production. Commingling these pools should increase the value of the remaining reserves due to using the remaining reservoir energy in both zones to produce the well.

Commingling operations conducted on other similar wells have resulted in increased production rates and greater reserve than producing the zones separately.
