XTO Energy Inc. requests approval for an exception to Rule 303-C to permit downhole commingling of production from the Ballard Pictured Cliffs (71439) and the Basin Dakota (71599) pools in the apache Federal #13E. XTO is currently recompleting this well in the PC and the DK is producing. XTO will downhole commingle these pools upon completion of the Pictured Cliffs. Both zones are included in the pre-approved pools established by Division Order R-11363. Based on production analysis of wells located in a nine section surrounding area the following allocation was determined:

Basin Dakota	Oil 100%	Gas 74%
Ballard Pictured Cliffs	Oil 0%	Gas 26%

Both pools have common interest owners. Commingling both zones will not reduce the ultimate recovery of either pool. Downhole commingling will improve recovery of liquids, eliminate redundant surface equipment and maximize productivity. BLM has been notified of intent to DHC with filing of Form 3160-5.
