Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Currently there is a rig on location to clean out and reset the pump. The subject well is currently producing downhole commingled from both the Pictured Cliffs and the Dakota formations.

The Pictured Cliffs keeps sanding out and plugging the pump causing the well to be shut-in and requiring numerous workovers to keep the well producing. In order to reduce workovers and return the Dakota to production. Four Star requests verbal permission to abandon the Pictured Cliffs formation.

The procedure to abandon the Pictured Cliffs is as follows:

Set a composite bridge plug @ 1660' below the PC perfs @1614'-1656'.

**32. Additional remarks, continued**

Squeeze the Picture Cliffs with 250 sxs of Class G cement.  
Wait on cement and drill out cement to CBP and test casing to 500#.  
If casing holds drill out CBP, stimulate as needed and return Dakota to production.
