On 11/24/04 BP America Production Company submitted an application for permit to drill and complete the subject well into the Basin		
Dakota; produce the well in order to establish a production rate, isolate the zone, then add the Blanco Mesaverde and commingle		
production Downhole. APD was approved 01/04/2005. BP now seeks NMOCD approval to Downhole commingle production in the subject well as per procedure on reverse side of this Form.

The Basin Dakota (71599) & the Blanco Mesaverde (72319) Pools are Pre-Approved for Downhole Commingling per NMOCD Order R -		
11363. The working and overriding royalty interest owners are different in the proposed commingled pools; therefore notification of		
this application is submitted by cop	y of this application to all interest owners via certific	ed mail (return receipt)

Production is proposed to be based on a fixed percentage. We will complete in the Basin Dakota Pool, isolate the Dakota; complete into the Blanco Mesaverde, establish a production rate; drill out the bridge plug and commingle production downhole. The deliverability test		
will be performed on the combined	zones and MV rate will be subtracted from the total	well stream to establish the DK rate.
Commingling Production Downhole in the subject well from the proposed pools will not reduce the value of the total remaining production		
I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-		
grade tank has been/will be constructed or closed according to NMOCD guidelines , a general permit or an (attached) alternative OCD-approved plan .
