Farmington, New Mexico June 23, 1953

Well No. 3 is located 1740 ft. from ☒ line and 1500 ft. from ☒ line of sec. 10SW 1/4 of Section 10
(1/4 Sec. and Sec. No.)T-32-N
(Twp.)R-5-W
(Range)NMP
(Meridian)Wilcox
(Field)Rio Arriba
(County or Subdivision)New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is 7550 ft. (Ungraded ground)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well to approximately 4300 feet. Rotary tools will be used to total depth. Drill stem tests will be run over the Fruitland pay section and the Pictured Cliffs pay section. Casing will be set on top of the Pictured Cliffs pay section. If stimulation is necessary the pay section will be shot open with H₂O and clean out will be with cable tools.

The following casing program is proposed:

Size	Depth	Amount	Remarks
9-5/8"	250'	250	200% of theoretical amount to circulate.
7"	4000'	350	150% of theoretical amount to fill to surface casing.

Copies of location plate are attached. 1 copy of any survey taken will be submitted upon completion of well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
