Navajo B
Well No. 1-W is located 1375 ft. from [N] line and 2015 ft. from [E] line of sec. 19
NW SE Sec. 19 31 N 16 W N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Horseshoe Gallup San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

ground
The elevation of the derrick floor above sea level is 5529 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a water source well to an approximate total depth of 3000' on our Navajo B lease for the purpose of furnishing water for a secondary recovery project. Two zones of interest will be encountered, the Dakota and the Harrison. 100' of 13-3/8" O.D. casing will be set and cemented to surface. Our production string will be 8-5/8" O.D. casing and it will be cemented with the cement brought up above the Gallup formation which is the water bearing horizon. The well will be completed through perforations and treatment will not require any stimulation.

"Effective May 3, 1966, The Atlantic Refining Company changed its name to Atlantic Richfield Company"

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
