Type of Release: natural gas	Volume of Release: approx. 145 Mcf of gas	Volume Recovered: no gas recovered
Source of Release: dump valve on separator	Date and Hour of Occurrence: 11:00 PM, 8/23/10	Date and Hour of Discovery: 9:00 AM, 8/26/10
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour:	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

RCVD SEP 10 '10

OIL CONS. DIV.

DIST. 3

Describe Cause of Problem and Remedial Action Taken.*

The dump valve on the separator was stuck in the open position, releasing gas through the valve into the atmosphere. The valve controller was adjusted so the valve could close completely and the leak was stopped.

Describe Area Affected and Cleanup Action Taken.*

The gas released dissipated into the atmosphere so no clean-up action was possible.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
