13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

In September 2009, a pit tank (historically used to store produced water) was removed from the site in conjunction with plugging of the Rincon #169 (API 30-039-20160) gas production well. Initial corrective action included excavation of potential hydrocarbon-impacted soil to bedrock at a depth of approximately 19 feet below ground surface (ft bgs) in an area approximately 80 ft by 60 ft along the surface perimeter of the excavation and 25-ft by 15 ft along the bottom of the excavation. No detectable concentrations of TPH were identified in samples from the excavation sidewalls.

Chevron proposes to backfill the excavation with clean, "virgin" fill material from Envirotech. The remaining material onsite from excavation will be taken to Envirotech in order to be land farmed. The excavation will be backfilled then graded, contoured, and reseeded with a mix of native grasses.
