13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

As a follow up to the 3160-5 sundry for the Rincon 135 (API# 3003908917) sent November 2010, Chevron Midcontinent LP wants to specify that the Basin Dakota pool (completed in January 1960) should have the downhole completion addendum of C01 and the Blanco-Mesaverde pool (completed February 1960) should have the downhole completion addendum of C02. Below is the corrected allocations:

This well was previously completed in the Blanco-Mesaverde (from 4846-5478') and the Basin-Dakota (from 7352-7574'). On 4 Oct 2010 Chevron pulled the dual completion equipment out of the well, acid treated both formations through their respective perforations, and DHC both zones within the wellbore. the DHC allocation is as follows:

DH Completion 02 in the Mesaverde reservoir:
Oil -- 16% Gas -- 20% Water -- 50%

DH Completion 01 in the Dakota reservoir:
Oil -- 84% Gas -- 80% Water -- 50%

Please see attached for justification.
