Responsible Party

Responsible Party: BP America Production Co.	OGRID: 778	Final
Contact Name: Steve Moskal	Contact Telephone: (505) 330-9179	
Contact email: steven.moskal@bp.com	Incident # (<i>assigned by OCD</i>)	
Contact mailing address: 1199 Main Street, Suite 101, Durango CO, 81301		NVF1900239191

Location of Release Source

Latitude: 36.6943469°Longitude: -107.6434987°

(NAD 83 in decimal degrees to 5 decimal places)

Site Name: Hardie LS 001A	Site Type: Natural Gas Production Well Pad
Date Release Discovered: December 17, 2018	API#: 30-045-22415

Unit Letter	Section	Township	Range	County
J	26	T29N	R08W	San Juan

Surface Owner: State Federal Tribal Private (Name: _____)

Nature and Volume of Release

Material(s) Released (Select all that apply and attach calculations or specific justification for the volumes provided below)

<input type="checkbox"/> Crude Oil	Volume Released (bbls)	Volume Recovered (bbls)
<input type="checkbox"/> Produced Water	Volume Released (bbls):	Volume Recovered (bbls):
	Is the concentration of dissolved chloride in the produced water >10,000 mg/l?	<input type="checkbox"/> Yes <input type="checkbox"/> No
<input checked="" type="checkbox"/> Condensate	Volume Released (bbls): <u>Est 20 bbls</u>	Volume Recovered (bbls): <u>0 bbls</u>
<input type="checkbox"/> Natural Gas	Volume Released (Mcf)	Volume Recovered (Mcf)
<input type="checkbox"/> Other (describe)	Volume/Weight Released (provide units)	Volume/Weight Recovered (provide units)

Cause of Release:

Impacts were identified at the location on November 20, 2018 during a site inspection. A small stained area of soil was noted, but appeared to be isolated. The source was unknown. Upon further investigation, it was discovered an open ended flow line from the separator had been buried during the remedial activities of the BGT in March of 2018. On December 17, 2018, it was confirmed that the release had migrated at least 17 vertical feet from the surface. Full delineation of the release been completed and documented in the attached report.

Facility ID	
Application ID	

Was this a major release as defined by 19.15.29.7(A) NMAC?	If YES, for what reason(s) does the responsible party consider this a major release?
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
If YES, was immediate notice given to the OCD? By whom? To whom? When and by what means (phone, email, etc)?	

Initial Response

The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury

<input checked="" type="checkbox"/> The source of the release has been stopped. <input checked="" type="checkbox"/> The impacted area has been secured to protect human health and the environment. <input checked="" type="checkbox"/> Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices. <input checked="" type="checkbox"/> All free liquids and recoverable materials have been removed and managed appropriately.
If all the actions described above have <u>not</u> been undertaken, explain why:

Per 19.15.29.8 B. (4) NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please attach a narrative of actions to date. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see 19.15.29.11(A)(5)(a) NMAC), please attach all information needed for closure evaluation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Site Assessment/Characterization

This information must be provided to the appropriate district office no later than 90 days after the release discovery date.

What is the shallowest depth to groundwater beneath the area affected by the release?	<u>>400</u> (ft bgs)
Did this release impact groundwater or surface water?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 300 feet of a continuously flowing watercourse or any other significant watercourse?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 200 feet of any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 300 feet of an occupied permanent residence, school, hospital, institution, or church?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 500 horizontal feet of a spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 1000 feet of any other fresh water well or spring?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within incorporated municipal boundaries or within a defined municipal fresh water well field?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 300 feet of a wetland?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release overlying a subsurface mine?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release overlying an unstable area such as karst geology?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within a 100-year floodplain?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Did the release impact areas not on an exploration, development, production, or storage site?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

Attach a comprehensive report (electronic submittals in .pdf format are preferred) demonstrating the lateral and vertical extents of soil contamination associated with the release have been determined. Refer to 19.15.29.11 NMAC for specifics.

Characterization Report Checklist: *Each of the following items must be included in the report.*

- Scaled site map showing impacted area, surface features, subsurface features, delineation points, and monitoring wells.
- Field data
- Data table of soil contaminant concentration data
- Depth to water determination
- Determination of water sources and significant watercourses within ½-mile of the lateral extents of the release
- Boring or excavation logs
- Photographs including date and GIS information
- Topographic/Aerial maps
- Laboratory data including chain of custody

If the site characterization report does not include completed efforts at remediation of the release, the report must include a proposed remediation plan. That plan must include the estimated volume of material to be remediated, the proposed remediation technique, proposed sampling plan and methods, anticipated timelines for beginning and completing the remediation. The closure criteria for a release are contained in Table 1 of 19.15.29.12 NMAC, however, use of the table is modified by site- and release-specific parameters.

Remediation Plan

Remediation Plan Checklist: *Each of the following items must be included in the plan.*

- Detailed description of proposed remediation technique
- Scaled sitemap with GPS coordinates showing delineation points
- Estimated volume of material to be remediated
- Closure criteria is to Table 1 specifications subject to 19.15.29.12(C)(4) NMAC
- Proposed schedule for remediation (note if remediation plan timeline is more than 90 days OCD approval is required)

Deferral Requests Only: *Each of the following items must be confirmed as part of any request for deferral of remediation.*

- Contamination must be in areas immediately under or around production equipment where remediation could cause a major facility deconstruction.
- Extents of contamination must be fully delineated.
- Contamination does not cause an imminent risk to human health, the environment, or groundwater.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Closure

The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (electronic submittals in .pdf format are preferred) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.

Closure Report Attachment Checklist: *Each of the following items must be included in the closure report.*

- A scaled site and sampling diagram as described in 19.15.29.11 NMAC
- Photographs of the remediated site prior to backfill or photos of the liner integrity if applicable (Note: appropriate OCD District office must be notified 2 days prior to liner inspection)
- Laboratory analyses of final sampling (Note: appropriate ODC District office must be notified 2 days prior to final sampling)
- Description of remediation activities

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. The responsible party acknowledges they must substantially restore, reclaim, and re-vegetate the impacted surface area to the conditions that existed prior to the release or their final land use in accordance with 19.15.29.13 NMAC including notification to the OCD when reclamation and re-vegetation are complete.

Summary Record of Impacted Soils Remediation

- November 20, 2018 Initiated inspection of discovered release. Siting criteria established for closure standards (*see Site Inspection Section*).
- December 17, 2018 Initiated release investigation with advancement of two (2) trenches starting at the known point of release. Collected grab sample approximately 17 feet (**ft.**) below grade (**b.g.**) from trench #2 (*see Release Investigation Section*).
- December 18, 2018 Grab sample preliminary lab results were as follows;
benzene = 90.3 mg/Kg; benzene, toluene, ethylbenzene, and total xylenes (**BTEX**) = 1,690 mg/Kg; TPH (GRO+DRO) = 20,320 mg/Kg; total TPH = 22,240 mg/Kg; chloride = 103 mg/Kg.
- December 19, 2018 BP submitted subsequent C-141 which included Remediation Plan to the New Mexico Oil Conservation Division (**NMOCD**) and to Bureau of Land Management (**BLM**). NMOCD approved 01/02/2019. Information provided support for applicable closure standards.
- December 20, 2018 Received 12/17/2018 final laboratory reports. *Official date of impact discovery.*
- April 15, 2019 Initiated remediation via excavation and soil shredding (*see Site Remediation Section*). Scheduling of initial closure and treated soils sampling conducted 04/18/2019 and 04/19/2019 respectively (*see April Email Correspondence*).
- April 19, 2019 Received 04/18/2019 preliminary closure sample laboratory report. East and south sidewalls exceeded BTEX along with TPH (GRO+DRO) closure standards. Resampling of extended sidewalls scheduled for 04/22/2019. *Summary table of results listed on following pages.*
- April 23, 2019 Received 04/22/2019 preliminary closure sample laboratory report of extended sidewalls.
- May 9, 2019 Received final treated soil sample laboratory report. *Summary table of results listed on following pages.*
- May 17, 2019 Completed excavation backfilling.
- July 25, 2019 Conducted vadose zone sampling of treated stockpile areas (*see July Email Correspondence within Vadose Zone Confirmation Section*).
- August 2, 2019 Received 07/25/2019 vadose zone soil sample final laboratory report. *Summary table of results listed on following pages.* Aerial map and photos of sample locations along with lab report included in this document.

REMEDIATION

April 2019 Email Correspondence

From: Jeff Blagg
Sent: April 17, 2019 at 7:45 AM
To: Cory Smith - NMOCD, Adeloye, Abiodun – BLM, Brandon Powell - NMOCD
Cc: Don Buller - BPX, Dustin Mace - Unlimited, Steve Moskal - BPX, blagg_njv@yahoo.com
Subject: Re: Remediation Notification - Hardie LS 001A

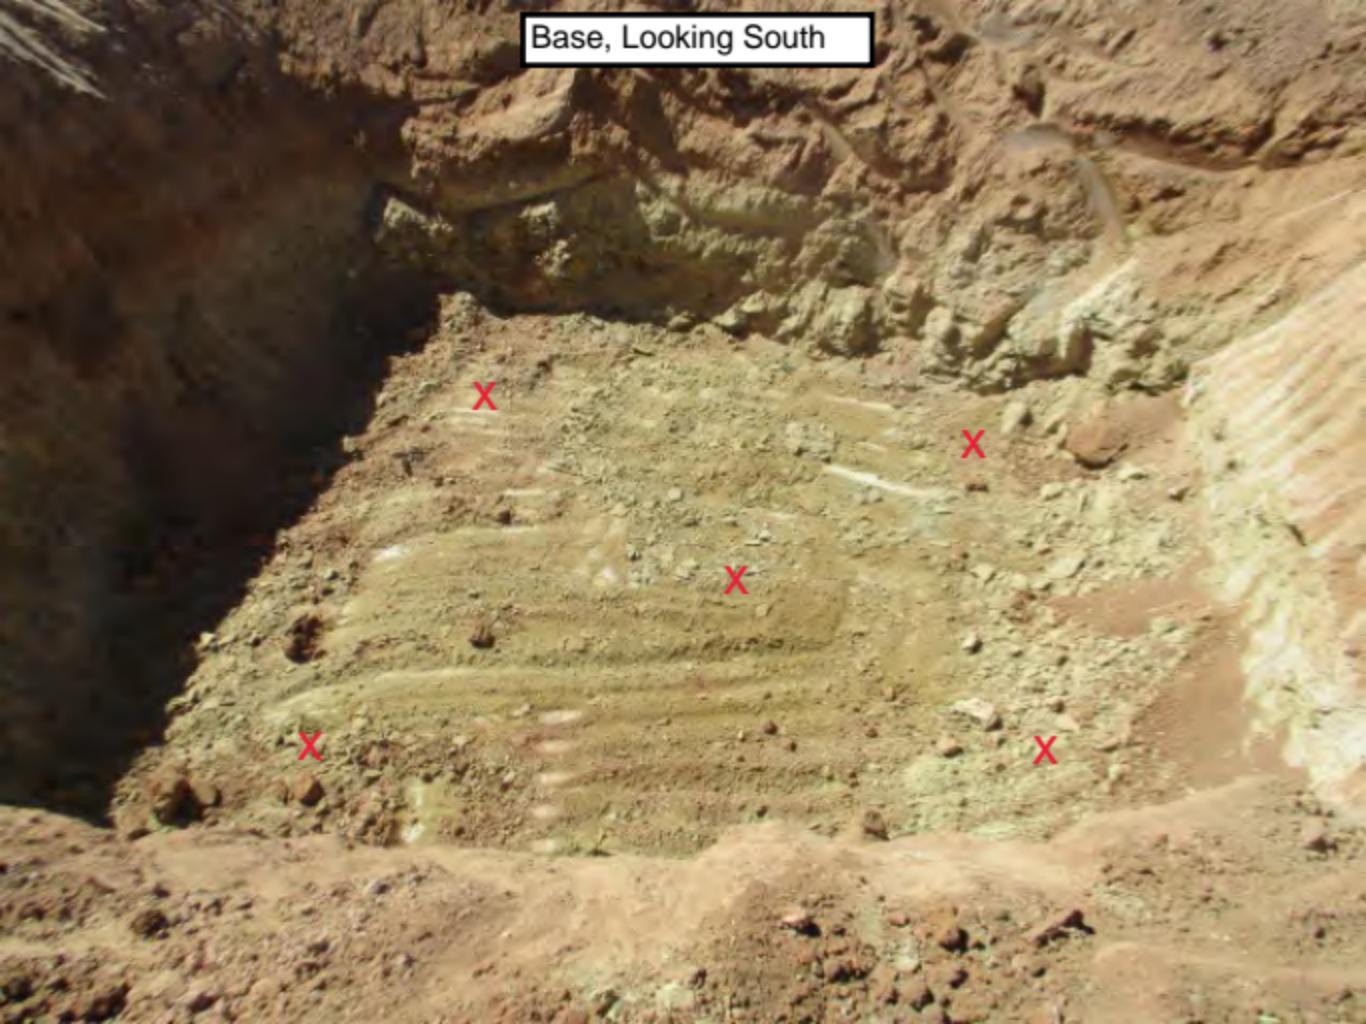

Cory, Emmanuel and Brandon:

Remedial activities at the Hardie LS 1A have been delayed and the excavation will not be ready for sampling today. We would like to schedule closure sampling for tomorrow at Noon. Treated soil sampling is now scheduled for Friday at Noon.

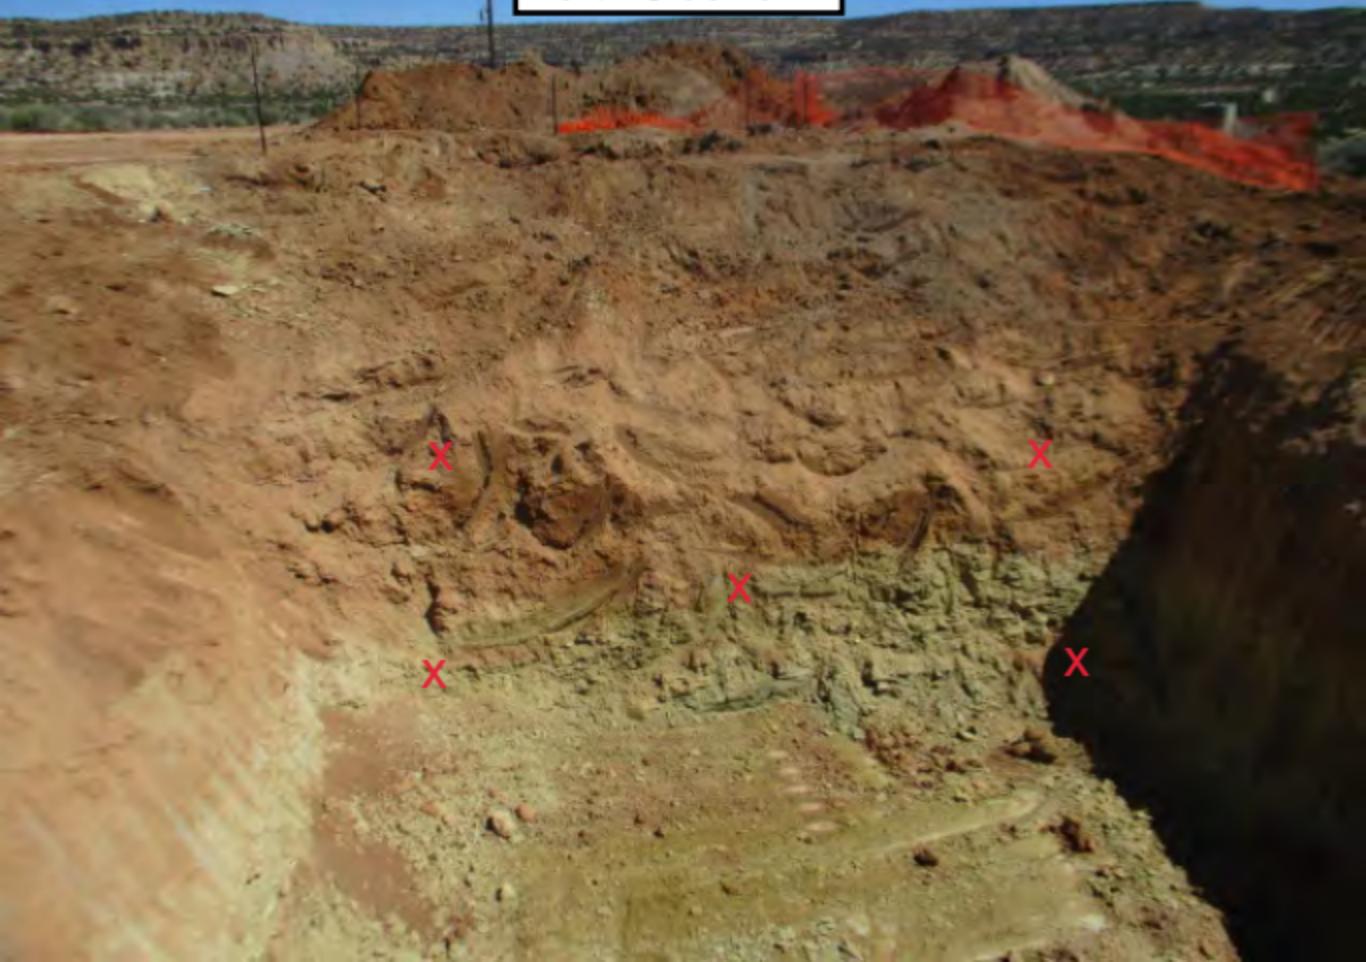

Thanks,

Jeff Blagg - Blagg Engineering, Inc.

VADOSE ZONE

CONFIRMATION

July 2019 Email Correspondence

From: Nelson Velez
Sent: Monday, July 22, 2019 8:39 AM
To: Smith, Cory, EMNRD
Cc: Powell Brandon EMNRD, Steven Moskal, Jefferey Blagg
Subject: Notification of BPX - Hardie LS 001A Treated Stockpile Vadose Zone Sampling

All,

On behalf of BPX Energy Inc., Blagg Engineering, Inc. plans to conduct environmental sampling at the Hardie LS # 1A site this coming Thursday, July 25th or Friday, July 26th.

If you wish to witness this event, please contact Jeff Blagg or myself at your convenience. Thanks.

Incident #: cCS1801657853
API #: 300-45-22415
Legals: Unit Letter J, Section 26, T29N, R08W
GPS Coord.: 36.69402,-107.64330

Subject: Vadose Zone Sampling Plans

Cory,

Attached are the site maps for the vadose zone sampling scheduled for tomorrow and Friday.

For the Hardie LS 001A, we plan to split the two stockpile areas into 2 segments each, west and east in each area, for a total of four vadose zone samples, beginning at 8:00 AM tomorrow, 7/25. From there, we plan to move to the Wilch A 1, where the stockpile are will be split into 4 segments, the north half into 2, west and east, and the south half into north and south, for a total of four sample locations. We will then plan to move to the GCU Com H 180 for excavation closure sampling on the San Juan County owned surface.

On Friday, 7/26, we plan to sample the Day B 2B beginning at 10:00 AM. The stockpile area will be split into 4 equal segments, for a total of 4 samples. From there, the plan will be to mobilize to the historical landfarm area located at the Jennapah 1. Due to the unknown configuration of the landfarm area, the area on the north half of the well pad will be split into 4 equal sections, west, west central, east central and east, for a total of 4 samples.

All samples will be collected from the ground surface to a depth of approximately 8 inches. Each area will be sampled as composites samples, with a total of 6-8 points for each sample segments, depending on the size of the area. If any visual changes are noted, the area will be reassessed and an alternative sample plan will be discussed prior to sample collection.

Let me know if you have questions.

Subject: RE: Vadose Zone Sampling Plans

Steve,

So on average approximately 1,000 sqft per 5pt composite sample?

Subject: RE: Vadose Zone Sampling Plans

Yes, on the square footage, but with 6-8 points per composite, unless you'd like to see 5 points.

Steve,

6-8 is fine.. OCD approves the proposed sampling plan for below email.

Please include this approval in your final closure reports.

I, (field sampler), attest to the validity and authenticity of this sample. I am aware that tampering with or intentionally mislabeling the sample location, date or time of collection is considered fraud and may be grounds for legal action. Sampled by: Nelson Velez Samples requiring thermal preservation must be received on ice the day they are sampled or received packed in ice at an avg temp above 0 but less than 6 °C on subsequent days.

Analytical Report

Report Summary

Client: BP America Production Co.

Samples Received: 4/30/2019

Job Number: 03143-0424

Work Order: P904140

Project Name/Location: Hardie LS 1A

Report Reviewed By:

Date: 5/2/19

Walter Hinchman, Laboratory Director

Envirotech Inc. certifies the test results meet all requirements of TNI unless footnoted otherwise.
Statement of Data Authenticity: Envirotech, Inc, attests the data reported has not been altered in any way.
Partial or incomplete reproduction of this report is prohibited, unless approved by Envirotech, Inc.
Envirotech, Inc, currently holds the appropriate and available Utah TNI certification NM009792018-1 for the data reported.

Analytical Report

Report Summary

Client: BP America Production Co.

Samples Received: 7/25/2019

Job Number: 03143-0424

Work Order: P907096

Project Name/Location: Hardie LS 1A

Report Reviewed By:

Date: 8/2/19

Walter Hinchman, Laboratory Director

Envirotech Inc. certifies the test results meet all requirements of TNI unless footnoted otherwise.

Statement of Data Authenticity: Envirotech, Inc, attests the data reported has not been altered in any way.

Partial or incomplete reproduction of this report is prohibited, unless approved by Envirotech, Inc.

Envirotech, Inc, currently holds the appropriate and available Utah TNI certification NM009792018-1 for the data reported.

QC Summary Report

Comment:

Calculations are based off of the raw (non-rounded) data. However, for reporting purposes all QC data is rounded to three significant figures. Therefore, hand calculated values may differ slightly.
