Notify NMOC 24 hrs
prior to beginning
operations

COMPLIANCE

This well hasn't produced since Nov. 2011. It is BP's intent to restore to production by re-perforating the Fruitland Coal. Due to landowner issues we can not move onto the well until late Sept. or early Oct. 2011.

Therefore BP requests approval of a contingency procedure to plug & abandon the entire well bore, while on location, should the re-perf operation be unsuccessful and we are unable to restore the well back to production.

Please see the attached contingency P&A procedure. Should you have any questions please call engineer Carter Clemens @281-366-1384 or Cherry Hlava.
