NATURE OF RELEASE

Type of Release Produced Water	Volume of Release ~265 BBL	Volume Recovered ~200 BBL
Source of Release Production Tank – possible broken seam	Date and Hour of Occurrence Prior to 05/28/11 10:00 (AM)	Date and Hour of Discovery Same
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Brandon Powell, NMOCD-Aztec, Mark Kelly, BLM-FFO	
By Whom? Myke Lane, WPX (by email)	Date and Hour 5/28/11-16:00 (PM)	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	
If a Watercourse was Impacted, Describe Fully.		

Describe Cause of Problem and Remedial Action Taken. **Preliminary findings indicate the following:** drain valve cracked open and bull-plug not replaced following water pickup for disposal. Resetting bull-plugs a mandatory practice which was not followed.

Most of the water contained in bermed area but some ~25 bbl did leave berm. All water remained on well location. Well shutin immediately following discover and vac trucks dispatched immediately following discovery to recover released water for offsite disposal. Composite soil samples collected and field screened for hydrocarbons and lab tested for Cl.

Describe Area Affected and Cleanup Action Taken. Impacted area within active operating portion of well pads. No remediation action taken until wells remediated during P&A.

Criteria	Site Condition	Ranking Score
Depth to Groundwater	>100 (Cathodic)	0
Wellhead Protection Area	None	0
Surface Water Body	>1000 ft	0
Total Ranking		0
Lab	Results	RAL
	Spill Composite	
OV (ppm)	1.9	100
TPH by EPA – 418.1 (ppm)	112	5000
Cl (ppm)	140	

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: FW: Rosa Unit 362

Mr. Morris,

On June 3, 2011 a spill assessment was performed at the Rosa Unit 362. The closure standard for this site was 5000 ppm TPH and 100 ppm OV . A composite sample of soil collected from the spill area was tested and returned results of 112 ppm for TPH via USEPA Method 418.1 and 1.9 ppm for OV. The results were below regulatory limits however it is recommended that the area be scraped to remove visual staining.

Thank-you,
John Rollins
Field Technician
Envirotech Inc.
