If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\* The manufactured blow pit overflowed as the result of a malfunctioning pump. Upon discovery, the spill was isolated and vac truck was used to control the overflow.

Describe Area Affected and Cleanup Action Taken.\* All fluid remained on location and approximately 8 BBL of fluid were recovered. The muds used by ConocoPhillips Company in this basin are water based. Past sampling of cuttings have shown 97% pass rates on closure criteria. On this basis, no further action is required.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
