If a Watercourse was Impacted, Describe Fully.*		

Describe Cause of Problem and Remedial Action Taken.\* **The water tank overflowed due to contractor error & the well producing more water than expected. Upon discovery, the well was shut-in and a water truck was called to location.**

Describe Area Affected and Cleanup Action Taken.\* **All fluids remained within the berm and approximately 15 BBL of fluid were recovered. Confirmation sampling occurred and results were below the regulatory standard for total petroleum hydrocarbons, using EPA Method 418.1 and organic vapors using a photo-ionization device; however, chloride results were above the background of 310 ppm so excavation of Chloride impacted soils proceeded. Confirmation sampling occurred after excavation was complete and analytical results were below the background of 310 ppm; therefore no further action is needed.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
