Subject: Proposed Surface Commingle
Coolidge #2, Hoover #2 and Roosevelt #2
San Juan County, NM

Dear Mr. Lovato:

XTO Energy Inc. requests administrative approval for surface commingling of natural gas produced from the following wells: Coolidge #2, Hoover #2 and Roosevelt #2. These wells are located in Sections 21 and 22-Township 30N-Range 14W in San Juan County, New Mexico. Surface commingle approval was originally applied for October 22, 2007.

30-045-31220
30-045-31221

30-045-31222

XTO plans to produce the commingled gas through a central compressor, thus lowering operating expenses and extending the economic life of the wells. This increases the ultimate recoveries on all leases. The anticipated allocated fuel production and fuel usage for the compressor is noted in the attachments.

Each well will be equipped with allocation meters that will be maintained by XTO Energy in accordance with State and Federal Regulations (Onshore Order No. 5). Produced liquids will not be surface commingled.

The following attachments are included with this application:

- Map of all wells and their associated leases
- Form C-102 for each well (plats)
- Table of well with lease and agreement information, spacing, permits, gravities/BTU, MCF
- Schematic diagram showing all flowlines, compressors & equipment
- Details of allocation formula

Sincerely,

Jennifer Morrow
