RCUD APR 2 '08

**If a Watercourse was Impacted, Describe Fully.\*** NA

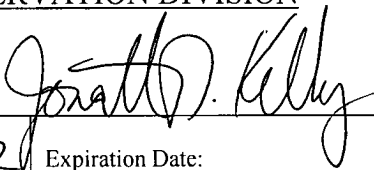

OIL CONS. DIV.  
DIST. 3

**Describe Cause of Problem and Remedial Action Taken.\***

A compressor fire was discovered on the subject location at approximately 10:45 am on 3/26/08. The well was shut-in and the fire was extinguished. Records show that the unit went down around 2:30 pm on 3/25/08, so it is estimated that the fire may have burned for 20 hours. The unit was severely damaged making the exact cause of the fire impossible to determine, but investigations point to the possibility of severe vibration problems, which led to a piping failure.

**Describe Area Affected and Cleanup Action Taken.\*** Fire was confined to the compressor skid.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
