13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

In reference to the letter recieved by the BLM on March, 9 2012 concerning the #1 Tenneco Federal, Running Horse Production Co. prefers at this point not to plug and abandon this well, but rather bring the well back onto production. Upon this, engineering will perform a review and analysis to determine if restoration of commercial production can be reached. Running Horse understands that the Communitization Agreement has been terminated and that this will need to be re-established if adequate production is accomplished. Please confirm that this approach is acceptable.

To be on production within 90 days
