NATURE OF RELEASE

Type of Release Produced Water	Volume of Release ~10 bbl	Volume Recovered ~10 bbl
Source of Release Produced Water Tank	Date and Hour of Occurrence <2/11/08 14:25 PM	Date and Hour of Discovery Same
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom? (Mark Kelly notified by email)	
By Whom? Myke Lane	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

RCVD FEB 12 '08

If a Watercourse was Impacted, Describe Fully.

OIL CONS. DIV.

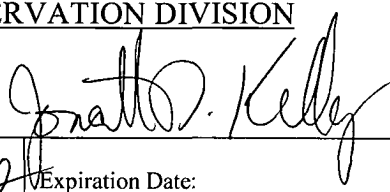

Describe Cause of Problem and Remedial Action Taken.

Transfer pump did not actuate due to Capstone generator shutdown. Produced water overfilled tank. All water contained within secondary containment. Well shut in until generator restarted and pump reset, and tank and containment drained.

Describe Area Affected and Cleanup Action Taken.

Immediately shut in well. Triple S recovered the water inside the berm and pull the tank level down. Generator checked possible hydrates in fuel gas. Restarted and transfer pump reset. No further action being taken at this time.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
