Casing Pres. _____ Tbg. SI Pres. _____ Max. Inj. Pres. _____
Bradenhead Pres. _____ Tbg. Inj. Pres. _____
Tubing Pres. _____
Int. Casing Pres. _____

Pressured annulus up to 530 psi. for 28 mins. Test passed/~~failed~~

REMARKS: Couldn't do a Bradenhead before MIT. The Bradenhead valve
was open. Had a malfunction with marking head on the chart at 25 to
30 min. so let it run for another 28 min. and it held steady.
