13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Due to operations recently assumed by Apollo Resources International, Inc. the exact nature of this well & 13 other B C & D wells, identified on BLM letter dated March 14, 2005, as shut in is unknown.

Evaluation of history and possible cost associated with restoration is planned to identify the best wells to restore first.

If satisfactory with the BLM, our proposed plan is to schedule restoring four wells per month to active status beginning June 1, 2005. This schedule may be accelerated if restoration proves economically beneficial.

If work on any given well is suspended due to unanticipated problems to severe to proceed, the well will be P&A'd or T&A'd with proper notification to the BLM.
