3. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Western Minerals and Oil, LLC proposes to complete and test this well in the South Blanco-Pictured Cliffs pool and Downhole Commingle the PC production with the existing Blanco-Mesaverde pool production. Attached is the NMOC form C-102 dedicating the SW/4 of Sec 24, T27N, R8W to the South Blanco-Pictures; the W/2 of said section is dedicated to the Blanco-Mesaverde pool. Ownership between the pools in the respective spacing units to be commingled is identical and controlled by Western Minerals and Oil, LLC, therefore notice of intent to downhole commingle to the interest owners is not required. Production data from the Blanco-Mesaverde (completed 3/1974) and test data from the S. Blanco PC will be used to determine the allocation of production. Downhole commingling will not reduce the value of the total remaining production. A copy of the NMOC application for downhole commingling these 'Pre-Approved' pools is attached. Currently the Marron #1 well located SW/SW Sec24, T27N, R8W is producing from the South Blanco-Pictured Cliffs. Once the Marron #6 is completed and tested as an economically productive PC well, the Marron #1 well will be shut in as a pressure observation well.
