N	26	031N	009W	900	south	1650	west	San Juan

**NATURE OF RELEASE**

Type of Release: Condensate	Volume of Release: 72 bbls.	Volume Recovered: 68 bbls.
Source of Release: Condensate Tank	Date and Hour of Occurrence: 2/23/00 1:00:00 PM	Date and Hour of Discovery: 2/23/00 2:00:00 PM
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If Yes, To Whom? Denny Foust, OCD Aztec, NM	
By Whom? Gregg Wurtz	Date and Hour: 2/23/00 4:02:00 PM	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. 0	
If a Watercourse was Impacted, Describe Fully. (Attach Additional Sheets If Necessary) No watercourse was impacted.		
Describe Cause of Problem and Remedial Action Taken. (Attach Additional Sheets If Necessary) Tank valve was opened and determined to be frozen. The valve was left open while operator responded to a compressor shut down. The valve thawed and condensate was released to the pit tank and secondary containment. Containment berm failed and condensate flowed off location approximately 20 feet. Clean up action started immediately to remove condensate and impacted soils off location and outside of berm on location. Pit tank containment berm was repaired and enlarged to increase containment capacity. An estimate 10 cu.yds. of soil was excavated.		
Describe Area Affected and Cleanup Action Taken. (Attach Additional Sheets If Necessary) Area within berm of pit tank and minor flow pathway 20 ft long and 1 ft. wide off location. No stream course or water body impacted. Depth to ground water estimated to be greater than 100 feet. Vertical extent of contamination was 6 inches, determined by soil borings and visible discoloration of soils. Soils were excavated to a depth of 8-12 inches based on absence of visible staining and landfarmed on site.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
