13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

we expect Hurricane to have a swab rig available beginning 11/30/2011. The currently completed intervals will be swab tested 11/30-12/2, and a decision will be made with respect to future operations after evaluation of the test results. Depending on the results of the test, we plan to acidize the completed intervals, fracture stimulate the completed intervals, or move downhole to perforate additional prospective zones.

Per the work described above, we are applying for/requesting a 2-year extension for the referenced lease, NMNM 107357.
