	<input type="checkbox"/> Convert to Injection	<input type="checkbox"/> Plug Back	<input type="checkbox"/> Water Disposal	

13. Describe Proposed or Completed Operation Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

The well was swabbed 11/30/2011-12/1/2011 to test for fluid entry following previous operations. 22 swab runs were made on 11/30, and 13 runs were made on 12/1.

We are currently in the process of analyzing our results and are consulting with industry personnel regarding future operations. We tentatively plan on fracture stimulating the currently completed intervals, and an additional interval may be perforated prior to stimulation. Discussions have been opened with area contractors, and we anticipate resuming completion/stimulation operations in January, 2012.
