We dug down and exposed the 20" surface csg and on 6/4/2012 welded a 2" weld-o-let to the outside of the surface csg, drilled 1-1/4 hole (no pressure on 20") on the inside of the weld-o-let into the surface csg cement to allow us to monitor pressure between the surface csg and the intermediate csg. OCD inspector was present as a witness.

See appendix A for new well head diagram.
