13. Describe Proposed or Completed Operation. Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once Testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

ConocoPhillips requests permission to use the subject location to stage facilities and equipment that will be used during the drilling and monitoring phase of the two new monitoring wells being we proposed with our sundry dated 9/5/12. If this area is too small to accomdate the facilities that will be brought in, we also request permission to use the area on the pad at our SJ 32-8 #2 CDP all on the same lease. All equipment will be staged on existing disturbance within one or both of these locations that are next to the monitoring well sites. Once finished with this project all surface disturbance will be reclaimed per BLM specifications. Plans are also to add sandstone as road base into the San Juan 32-8 202 well. Roger Herrera has given us verbal approval to get the sandstone from a nearby sandstone pit and to do the road maintenance before the rig moves in.
