13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

New well location 2600' FNL and 1215' FEL was approved to drill as an unorthodox location for the Gallup under Administrative Order NSL-5091 on Aug. 4, 2004.

Further inspection of site prior to construction revealed archlogical artifacts that were not identified on the original Archaeological Survey (Report #CR-2004-806, May, 21, 2004).

The well center of the proposed location was moved 265' North and 85' West to avoid the artifact site. The new location is Unit H, Sec 3, T26N, R5W with footage 2335 FNL & 1300 FEL.

The new location is still Non-Standard and a copy of letter to Mr. Michael Stogner, NMOCD Hearing Officer/Engineer in Santa Fe is attached along with the revised C-102.
