Verbal conformation was given to Devon Energy Production Company, LP by Adrienne Brumley to finish the completion of the NEBU 66M.

The first plan of action is to shoot 8 holes @ 4 SPF at 5,760' in order to circulate cement to surface outside the 4 1/2" casing. Should this attempt not work the second course of action will be to isolate the formations by doing a block squeeze in order to attempt to achieve the same result.

The rig will rig up on April 18, 2005 and the work will commence on April 19, 2005.
