	<input type="checkbox"/> Casing Repair <input type="checkbox"/> Water Shut off
	<input type="checkbox"/> Altering Casing <input type="checkbox"/> Conversion to Injection

13. Describe Proposed or Completed Operations

Because of operational problems, we are requesting permission to deepen this existing Basin Fruitland Coal well to approximately 3394' - into the Pictured Cliffs formation. It is anticipated that the Pictured Cliffs is not productive in this wellbore. The existing tubing and liner will be pulled, the hole will be circulated clean. The well will then be drilled to the new total depth. Then C/O, the 5-1/2" 15.5# liner will be rerun at approx. 3304' - 3394'. Tubing will be rerun and the well returned to production. Per E. Pippin a mudlogger will be on location to monitor for PC gas show. *Sump use granted 4/25/05*

14. I hereby certify that the foregoing is true and correct.
