13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date		
of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion		
or recompletion.		
Workover, Unlined:		
Burlington Resources proposes to construct a workover pit. Based on Burlington's interpretation of the Ecosphere's risk ranking criteria, the		
workover pit will be an unlined pit as detailed in Burlington's Revised Drilling / Workover Pit Construction / Operation Procedures dated November		
11, 2004 on file at the NMOCD office. Burlington Resources anticipates closing the pit according to the Drilling / Workover Pit Closure Procedure		
dated August 2, 2004 on file at the	NMOCD office.	
On this workover, a vent/flare nit n	nay be the only nit that will be required. A portion of	f this vent/flare pit will be designed to manage fluids, and that
portion will be unlined, as per the risk ranking criteria.
