☒ Other - remove packer & commingle

## 13. Describe Proposed or Completed Operations

Currently producing as a dual PC/MV well. It is the intent of this procedure to commingle this as a single PC/MV producing. The 1-1/4" on the PC will be pulled and laid down and the seal assembly on the 2-1/16" MV side will be released and laid down. A packer plucker will be run, the Model F1 packer milled over and the packer body will be pulled out of the hole. A bit and mill will be run to PBTD and new 2-3/8" production tubing will then be run.

The DHC application is being sent to the OCD for approval.
